

# Blue Eggs Universal Package Tracker

Corey Nambu, Dylan Lim, Jason Jones,  
Jezreel Salinas

## The Problem:

---

- Shipping services have become increasingly important to our everyday lives
- More than 36 million packages are delivered each day in the US<sup>1</sup>
- These packages are varying more in their contents, and their sources
- Keeping track of these packages requires a myriad of tracking solutions

<sup>1</sup><https://www.packola.com/blogs/boxing-and-packaging-articles/how-many-packages-are-shipped-in-the-united-states#:~:text=Some%2040%20years%20later%2C%20more.day%20in%20the%20United%20States>

# What people think:

---

# Our Solution

---

## Centralized Tracking

Create a webservice that can provide tracking to packages from all shipping services

## Notification and Integration

Notify the user of updates using a variety of services, from email and SMS to desktop and mobile notifications

## Easily Accessible

Using Flutter, our service will be available as a standard web service and portable to other formats. Flutter allows you to build apps for mobile, web, desktop, and embedded devices — all from a single codebase.
